## Components

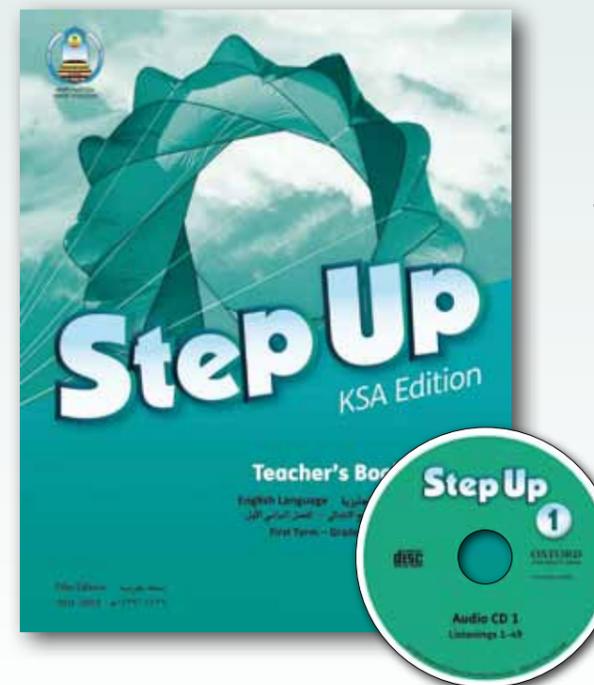

The Step Up series features one coursebook for each semester, from grades 4 to 6.

5 units of classroom study with extra practice for every unit in the integrated Workbook.

Extra activities, chants and phonics, packaged with the Student Book.

Teaching notes, tips and optional activities.

All the classroom audio, packaged with the Teacher's Book.

Flashcards are used to present the vocabulary.

The CD and flashcards are used to check pupils' understanding both visually and aurally.

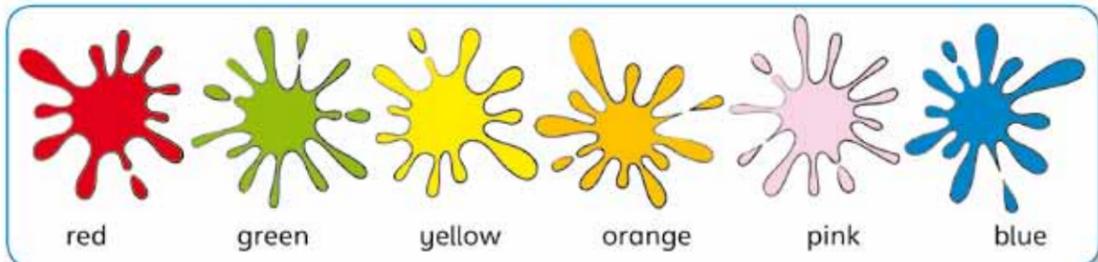

Dialogues help students to see the language in context. They also provide opportunities for students to practise the language learned from Lesson 1 by acting out the dialogue.

The workbook exercises can be used to calm down the class after playing a game. Activity 1 will also reinforce the language they are learning.

Pupils learn the sounds of the different letters in the Roman alphabet. Flashcards, wordcards, and lettercards from the teacher's resources combine to reinforce the phonic relationship between sound and letter.
